Guideline

The sensation in 'Ladies Hygiene'

Gold medal winner 2007  
«SALON INTERNATIONAL DES  
INVENTIONS DE GENÈVE»

1. The woman of today desires a modern solution for hygienic handling of her menstruation protection.

**goodbye** is the sensation in 'Ladies Hygiene': Disposal box and tampon dispenser in one unit.

2. The box will be placed in a holder and can be fixed to the wall at any height position. That way, the hygiene station can always be accessed comfortably!

### Function

3. A hygiene sachet will be taken from the front side. This hygiene sachet can be opened with gentle pressure of forefinger and thumb to its sides, and the used tampon can be inserted easily. Clean and elegant can the tampon be disposed, – only held at the retriever string.

4. With gentle pressure, the flip-top lid on the upper side can be opened. The inside of the box contains the integrated disposal unit.

5. The opening is closed with a special rubber lid.

6. If the box has already been used during the menstruation, then the smart opening hides the view to the inside and despite the opened flip-top-lid, – no odours will escape.

6. The hygiene sachet including tampon can now be simply inserted to the box via the flip-top-lid.

Quick, simple, with a maximum of hygienic comfort!

7. With gentle pressure, the lid can now be closed and snaps into position. Due to its intriguing technical design, the lid cannot open by itself.

### Additional advantage:

#### The tampon dispenser box

8. A gentle pressure is enough to open the drawer. Now a new tampon can be easily taken. The drawer can, depending on the tampon sizes, hold from 40 to 72 tampons. A gentle touch is enough and the drawer snaps back into its position and an undesirable open drawer is impossible.

### goodbye

#### – a well designed system

9. The backside of the box is perforated and allows simple opening. Now, the filled disposal bag has just to be closed and disposed with the household waste.

10. There are no limitations to the design – the hygiene station can be extended: With integrated air fresher station and toilet paper dispenser beneath the box, the **goodbye** mutates to an all-round service station.
